

ANALYSIS OF DIFFERENT FERTILIZERS IMPORTED AND EXPORTED BY USA FROM 2005-2012

Total Number of Fertilizers imported and exported by United State of America during the year 2005 to 2012 was

26

Percentage of Importation and Exportation of different fertilizers by USA in 2012

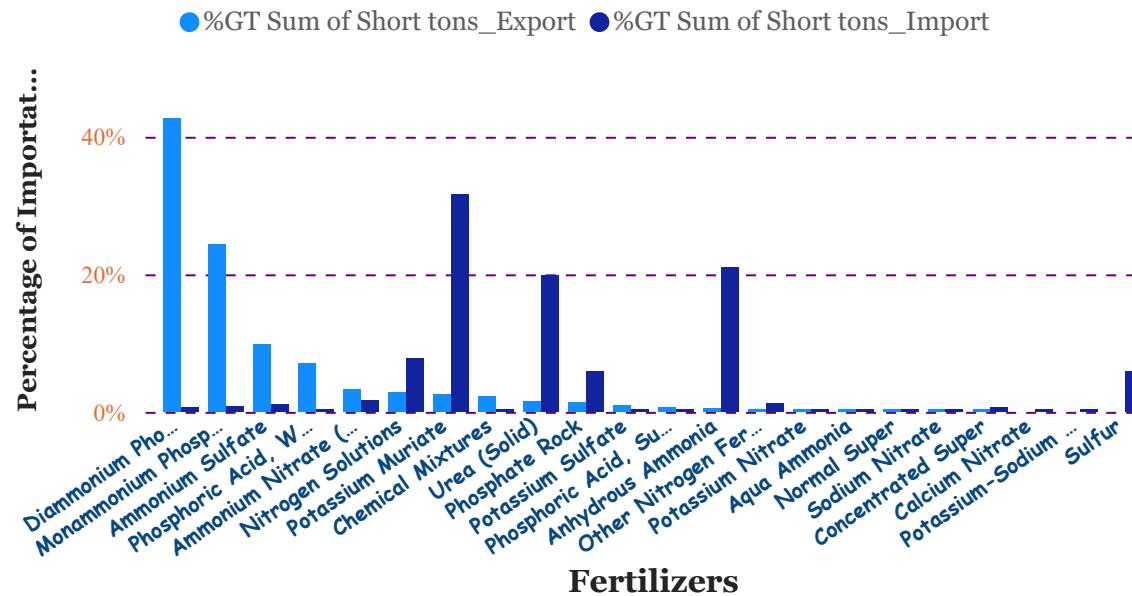

Total Number of countries that USA imported and Exported different fertilizer from are

193

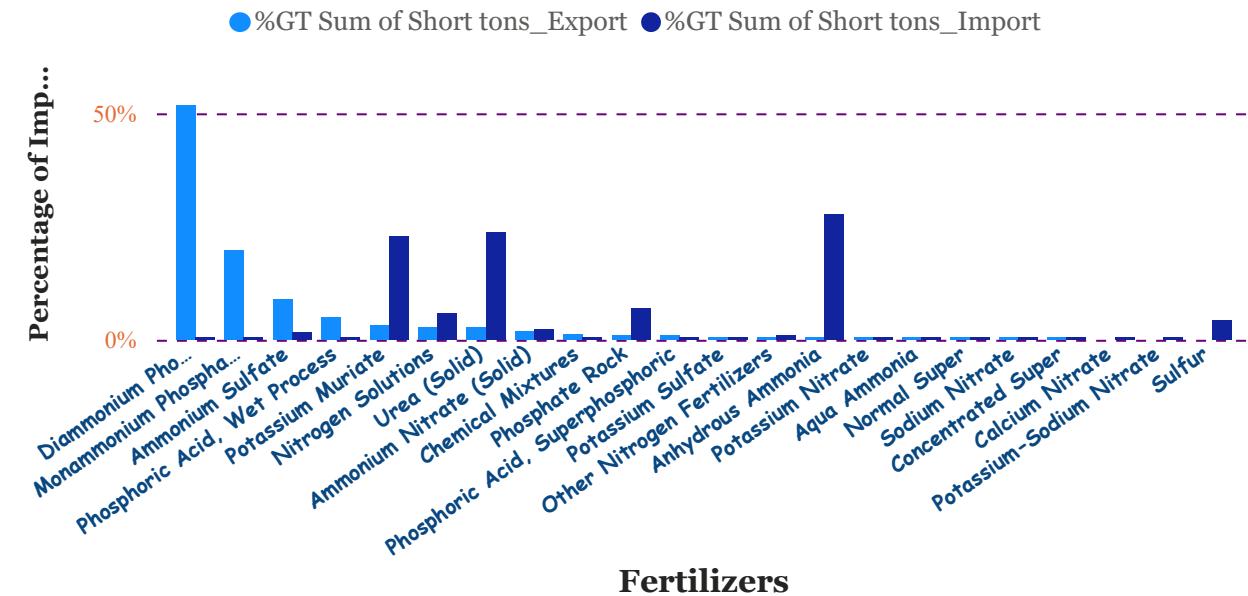

Importation of Fertilizers by USA was at the Peak in 2011 (38.3M ton) while the Fertilizer Exportation was at the peak in the Year 2005 and 2006 respectively (13.2M tons). The ratio of Importation to Exportation was Lowest in the Year 2009.

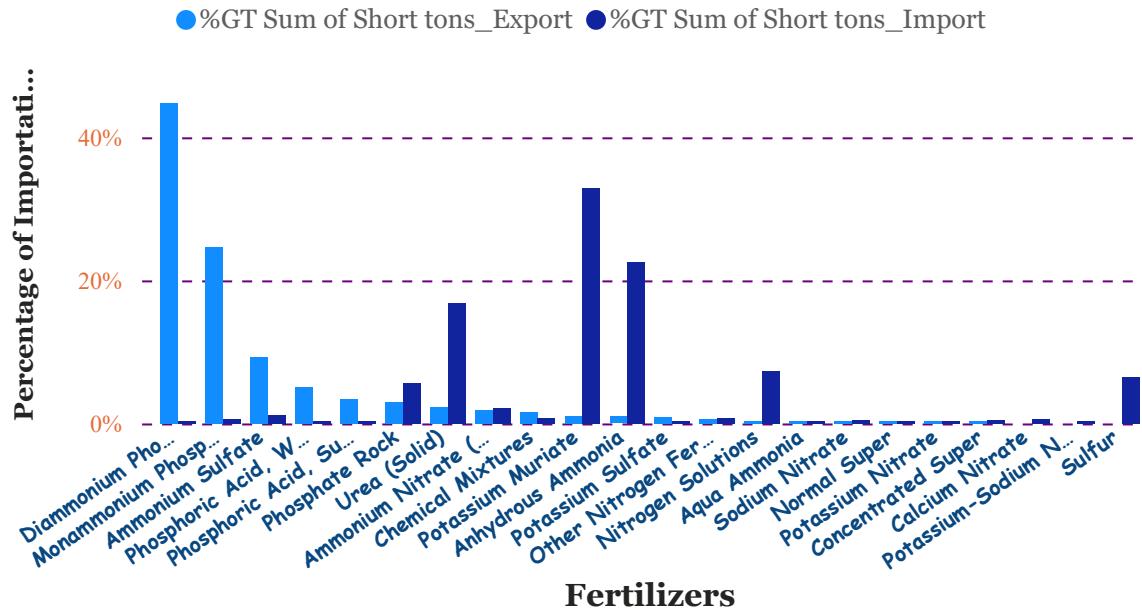

Percentage of Importation and Exportation of different fertilizers by USA in 2010

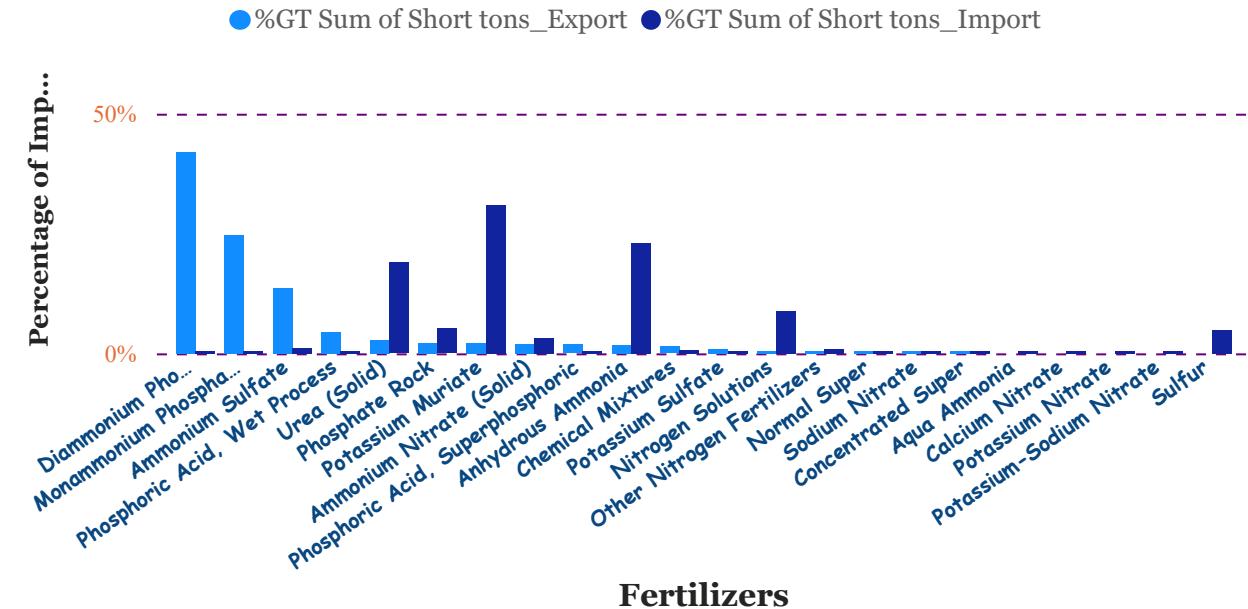

Percentage of Importation and Exportation of different fertilizers by USA in 2009

Percentage of Importation and Exportation of different fertilizers by USA in 2008

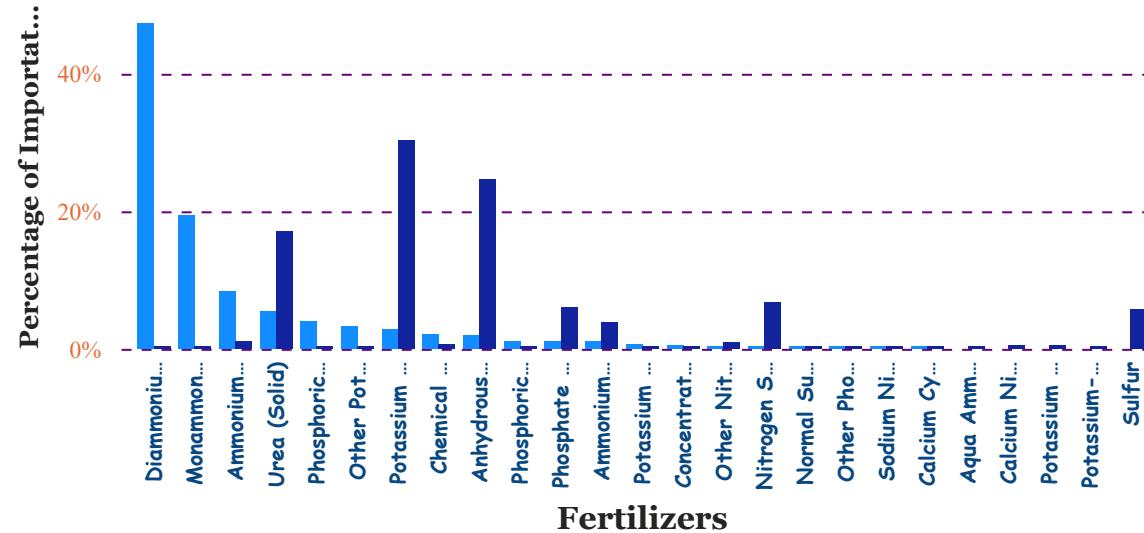

Percentage of Importation and Exportation of different fertilizers by USA in 2007

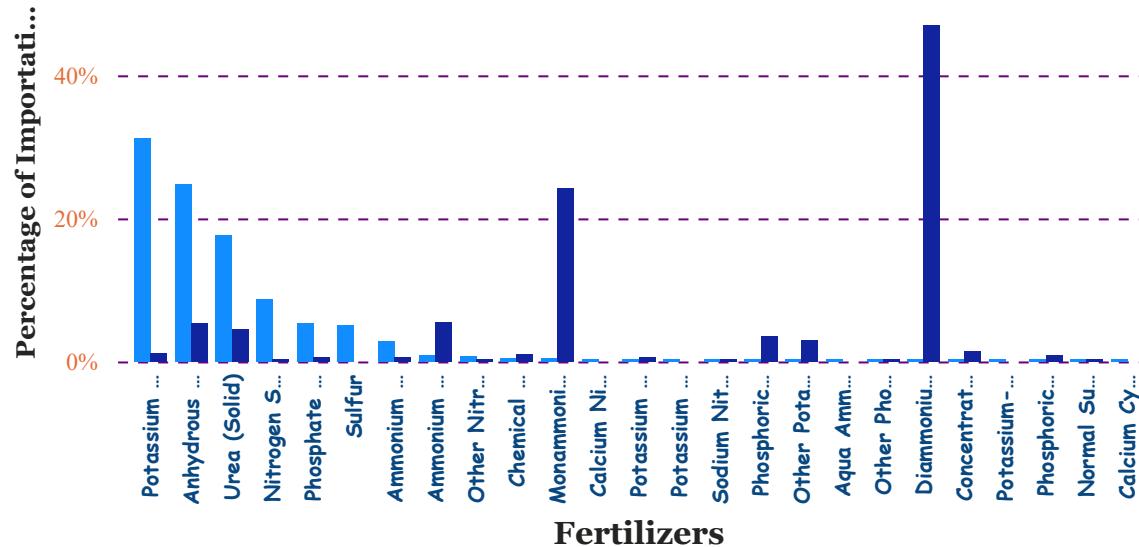

Percentage of Importation and Exportation of different fertilizers by USA in 2006

● %GT Sum of Short tons_Export ● %GT Sum of Short tons_Import

In 2012, this Map Indicated that most of the Fertilizers are Imported from European Countries, Although Canada is the countries that Exported most of the Fertilizers Impoted by USA

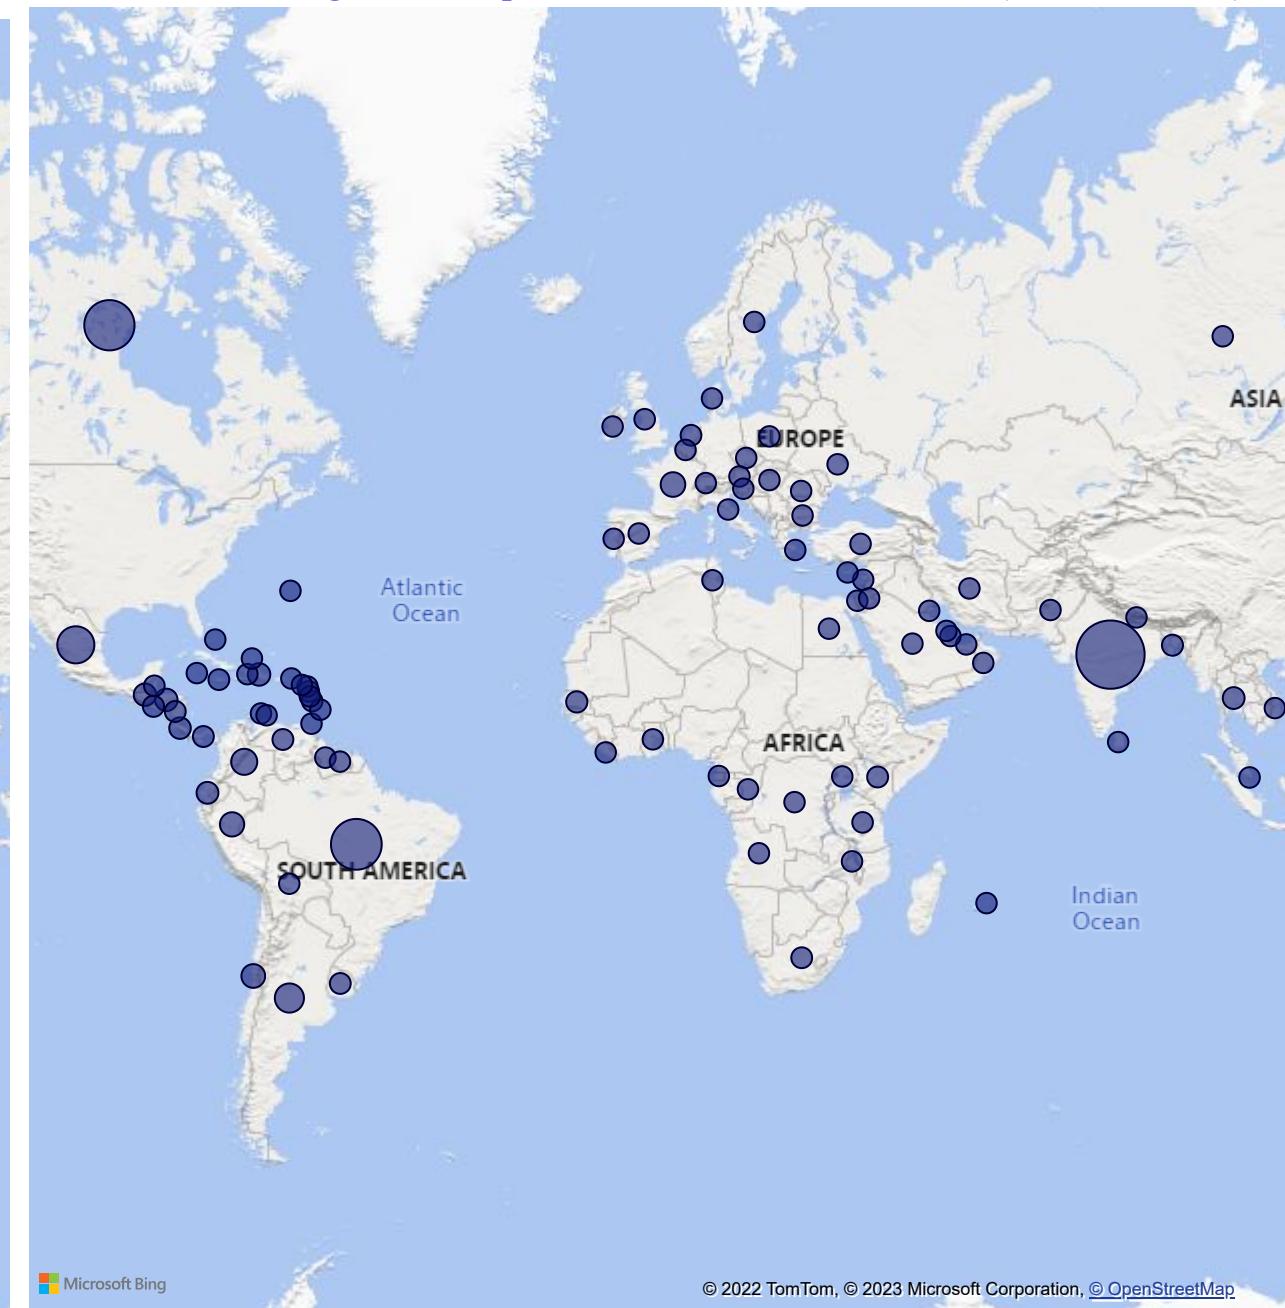

In 2012, this Map Indicated that Fertlizers from USA are Exported to different countries in a Diverse Pattern. Majorly Europe, Africa and South American countries, Although Canada Imported the Bulk of the Fertilizers (2,052,233.5tons)

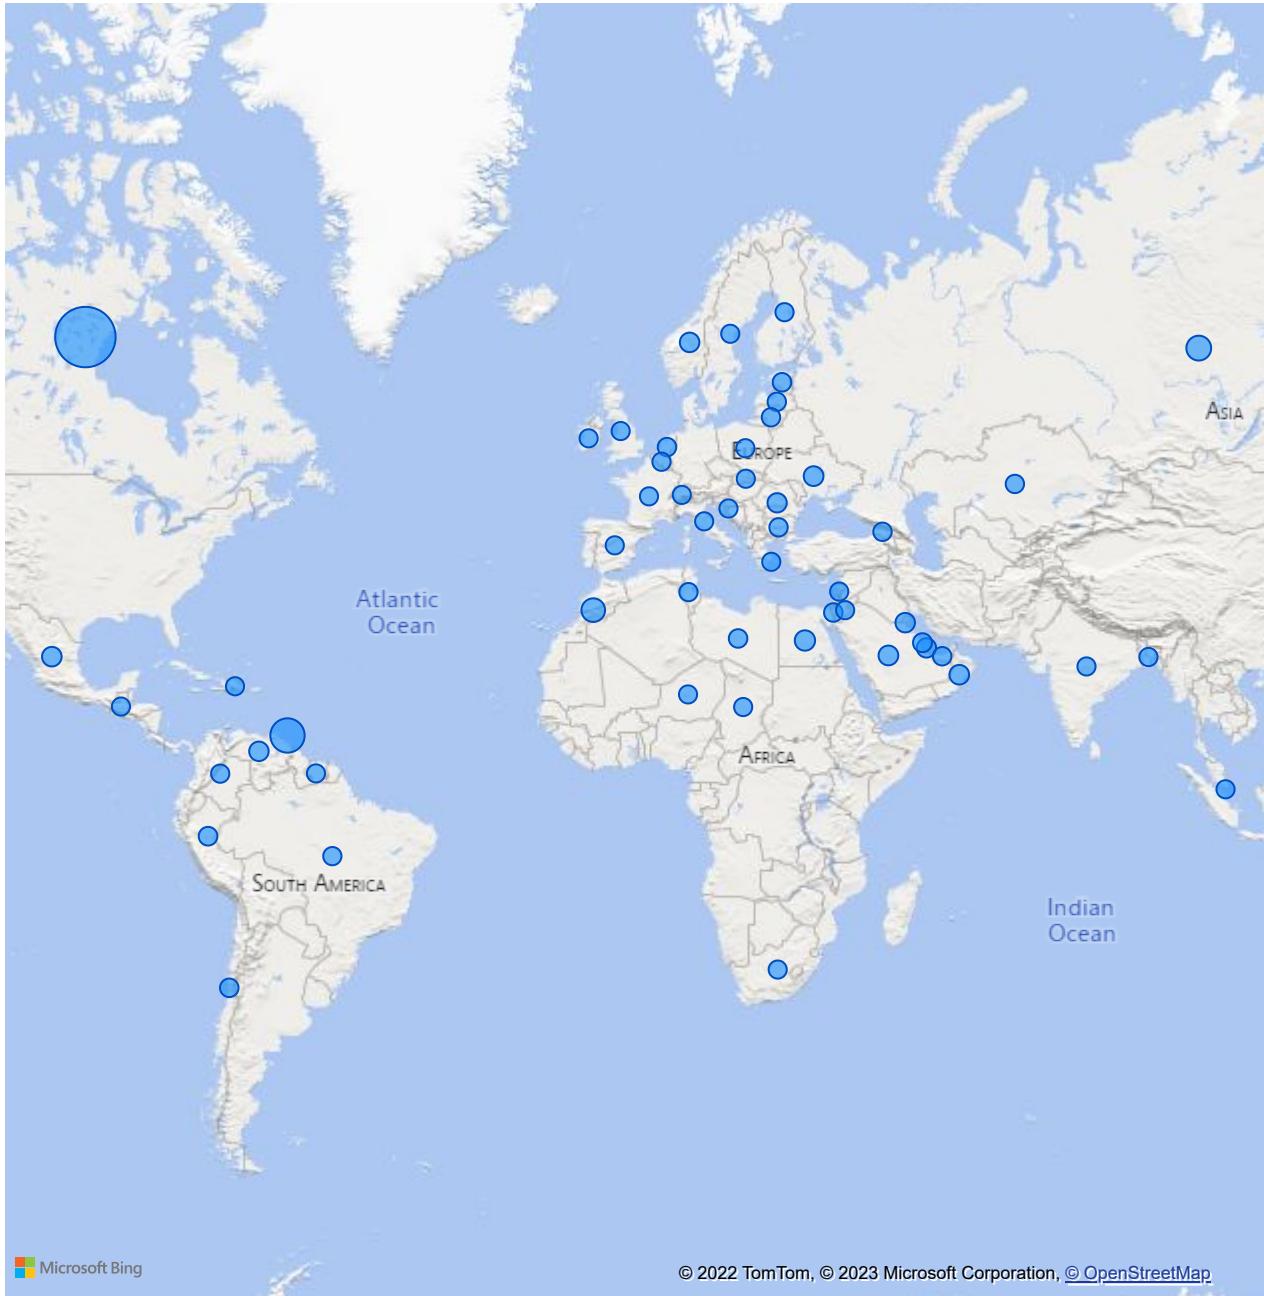

In 2011, this Map Indicated that most of the Fertilizers are Imported from European Countries, Although most of the Fertilizers Imported by USA are from Canada

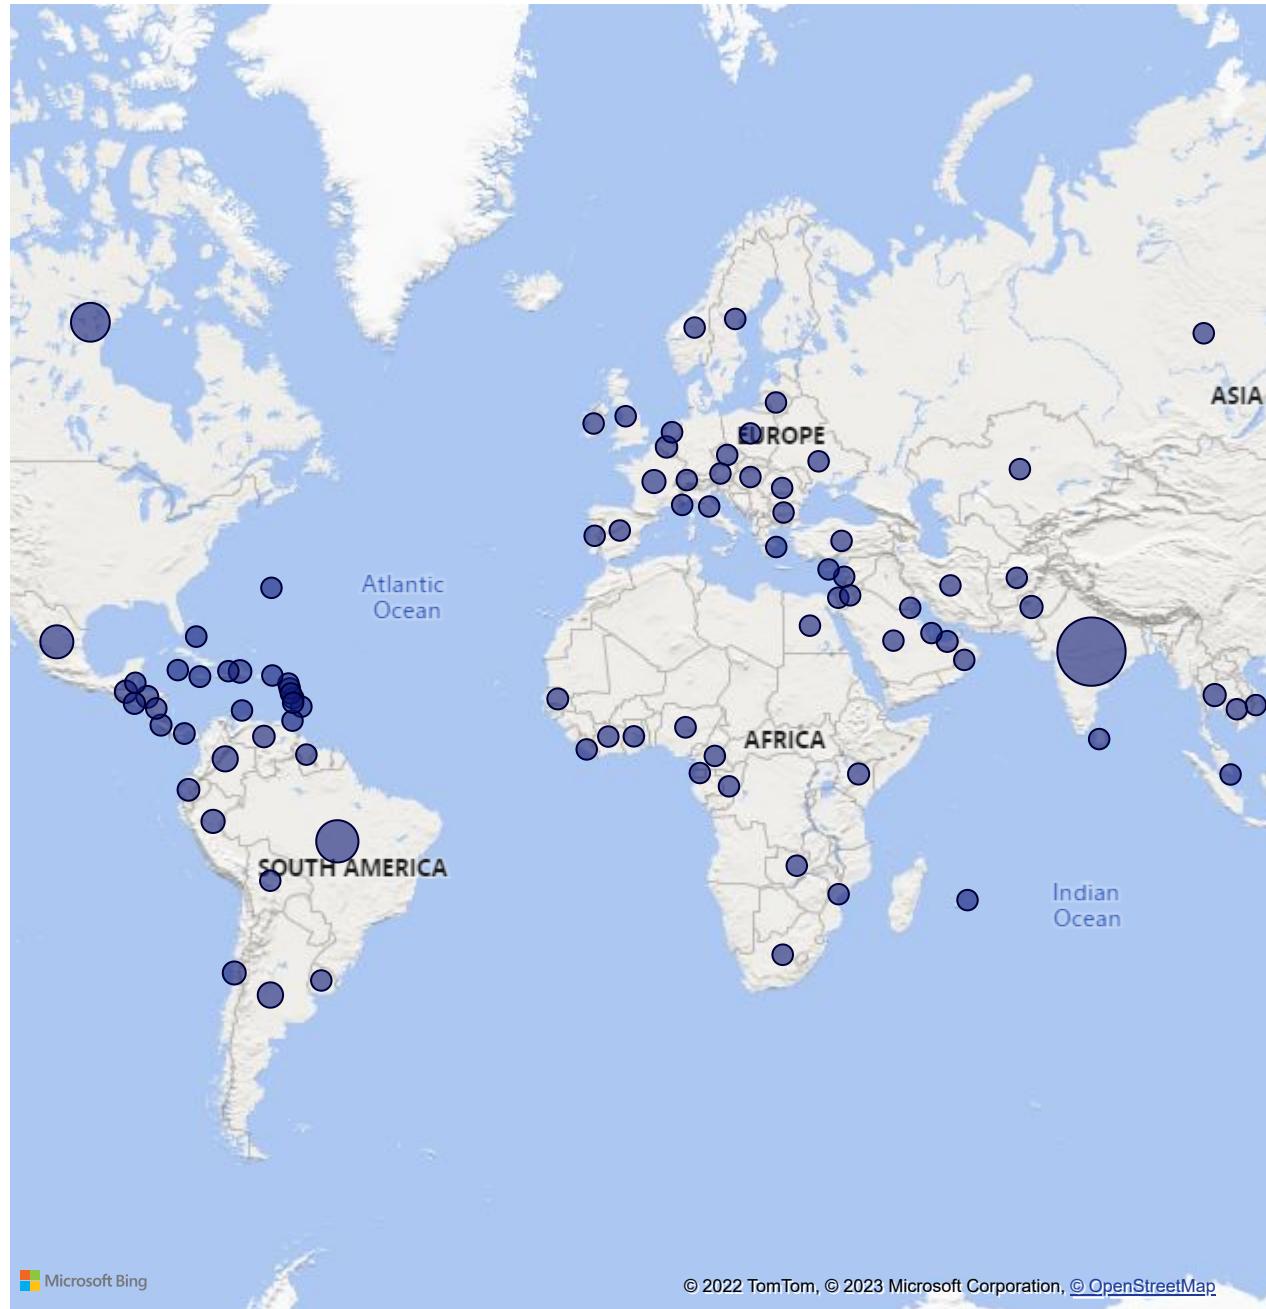

In 2011, this Map Indicated that Fertilizers from USA are Exported to different countries in a Diverse Pattern. Majorly Europe, Africa and South American countries, Although India Imported the Bulk of the Fertilizers (2,967,702.4tons)

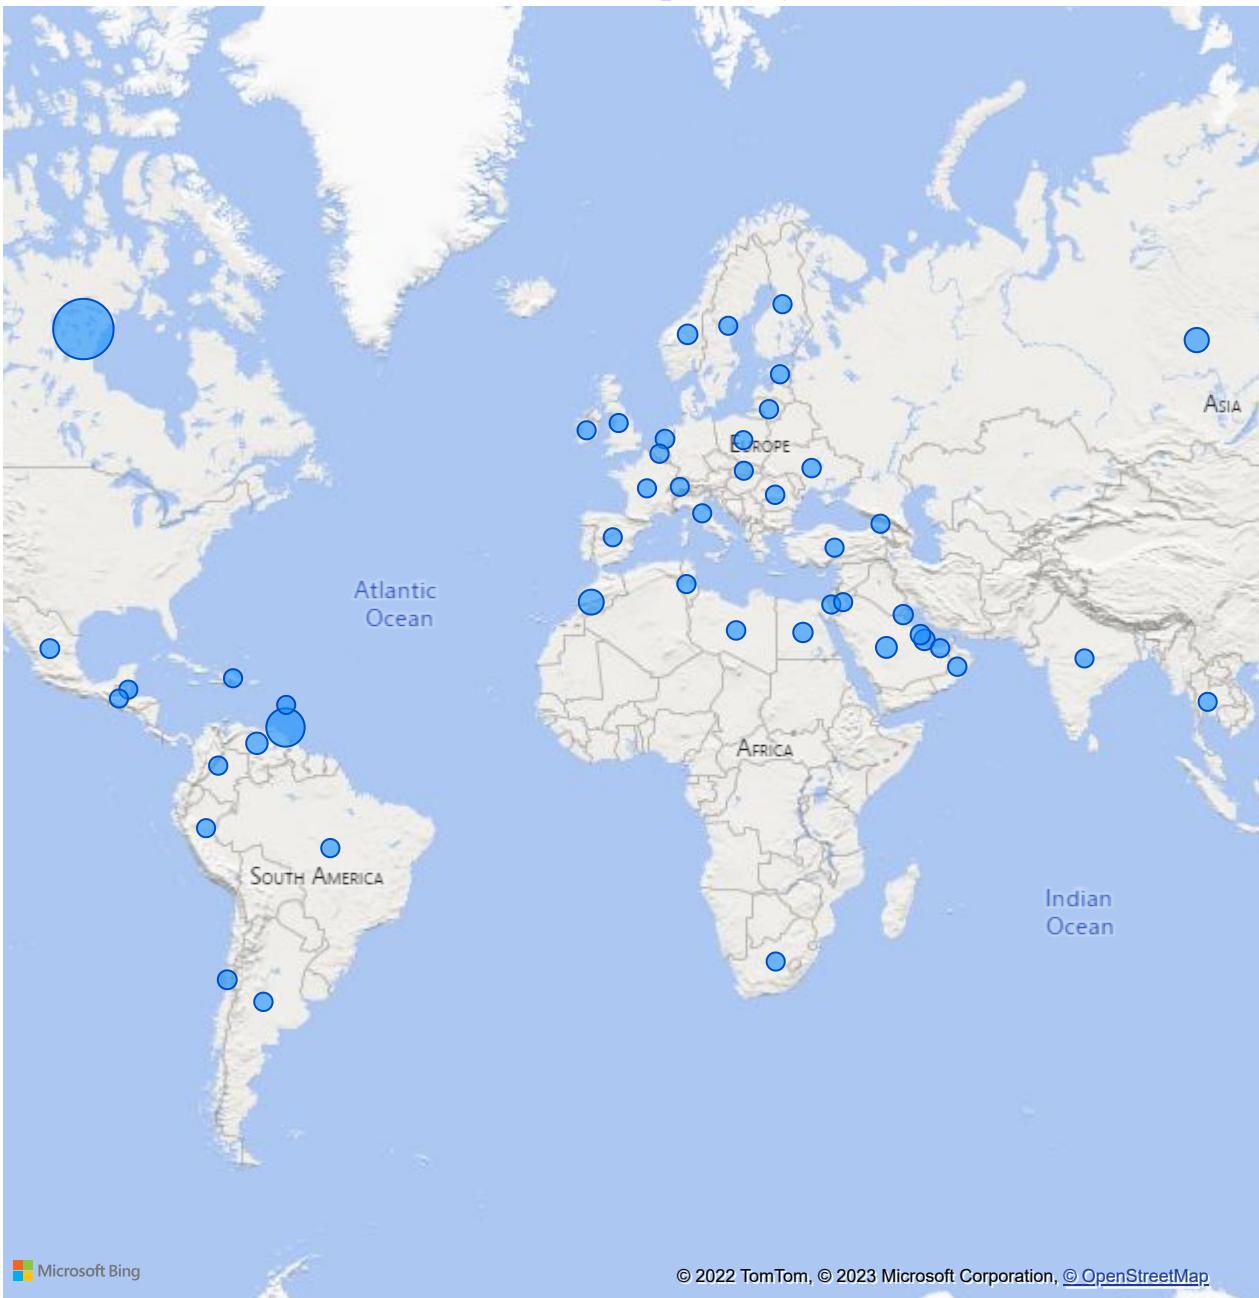

In 2010, this Map Indicated that most of the Fertilizers are Imported from European Countries, Although Canada is the countries that Exported most of the Fertilizers Impoted by USA

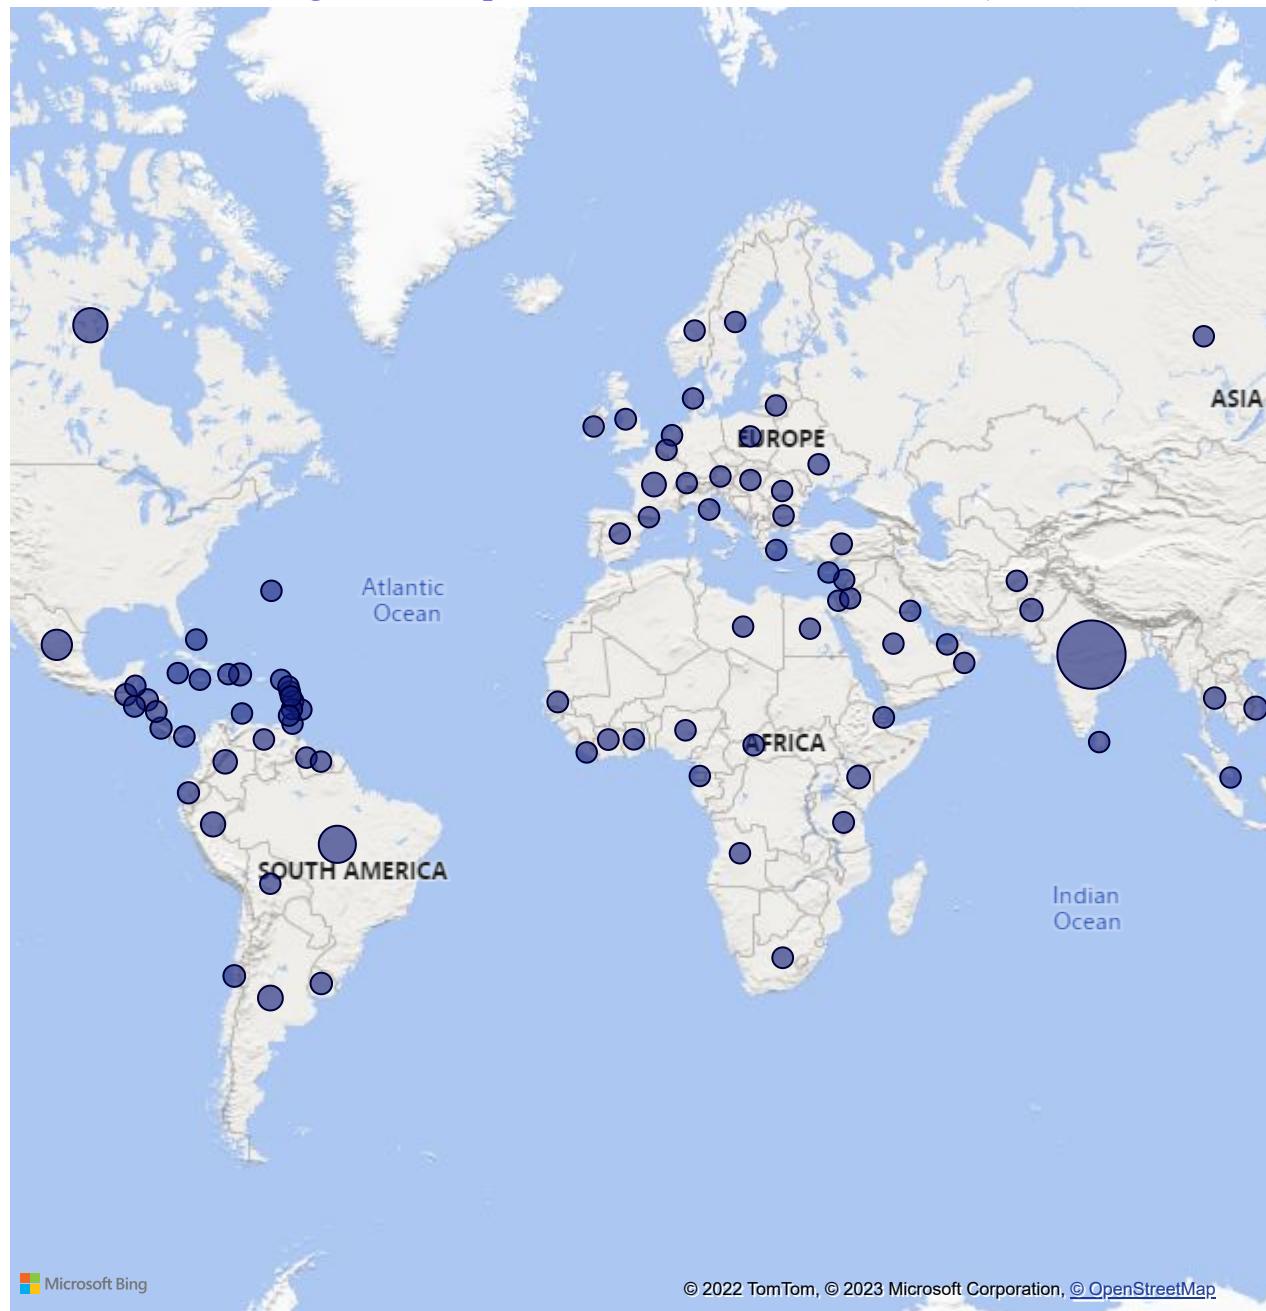

In 2010, this Map Indicated that Fertlizers from USA are Exported to different countries in a Diverse Pattern. Majorly Europe, Africa and South American countries, Although India Imported the Bulk of the Fertilizers (3,312,178.9tons)

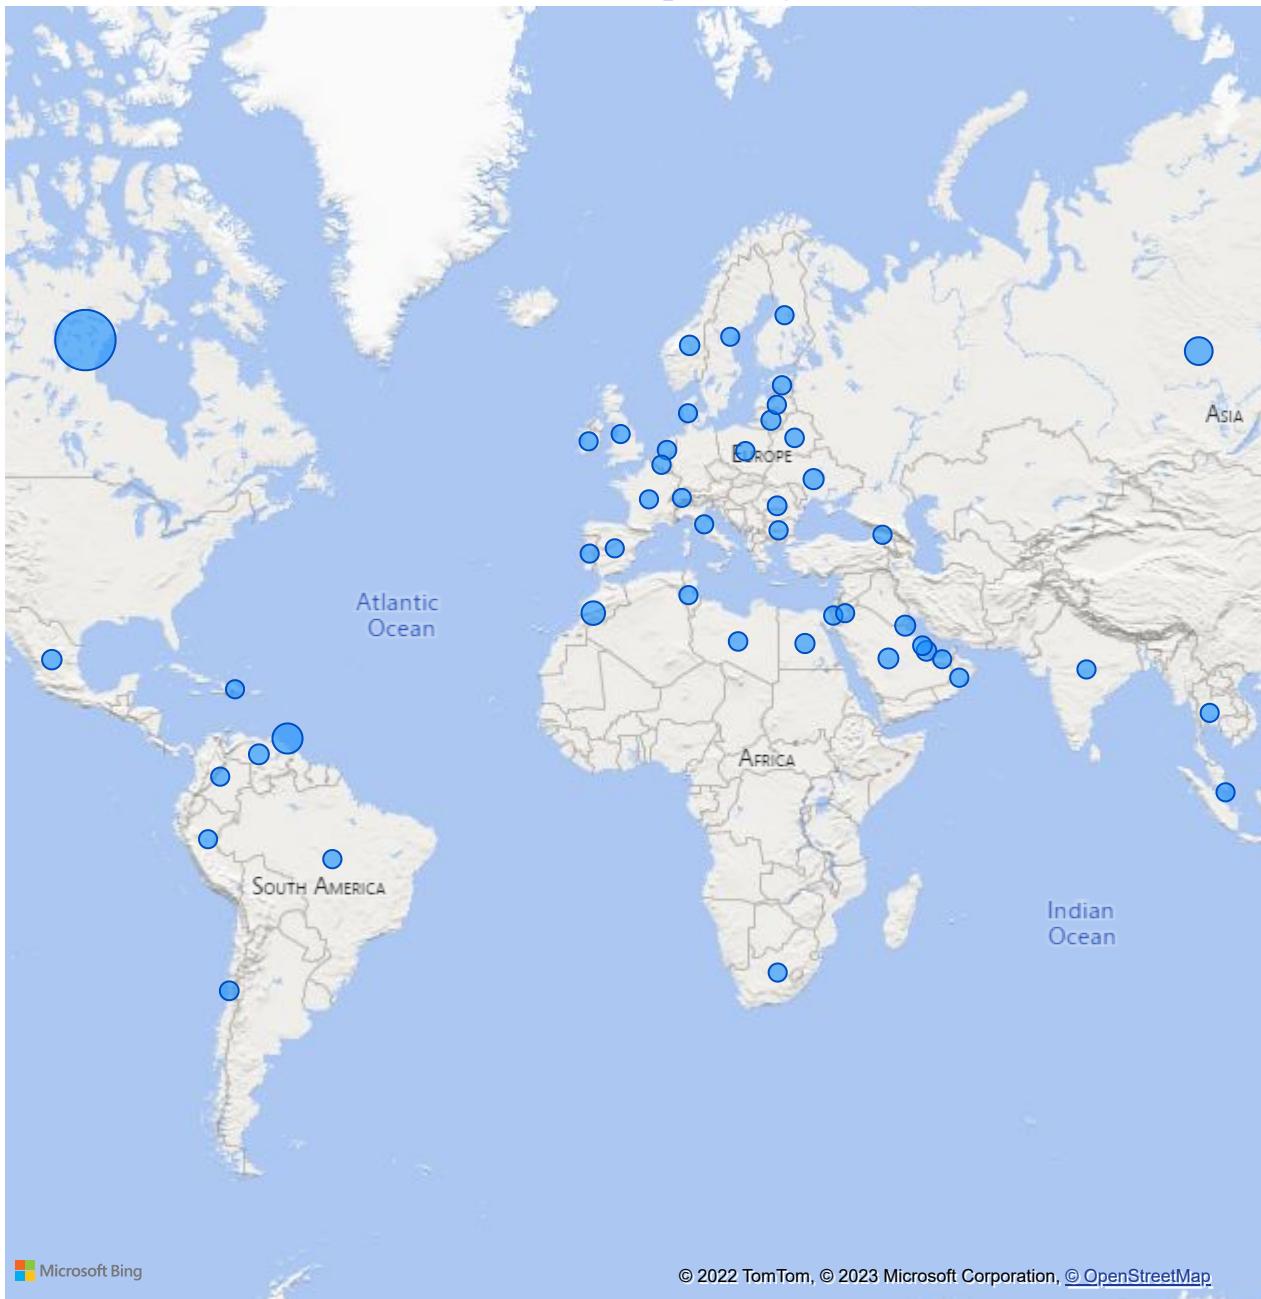

In 2009, this Map Indicated that most of the Fertilizers are Imported from European Countries, Although Canada is the countries that Exported most of the Fertilizers Impoted by USA

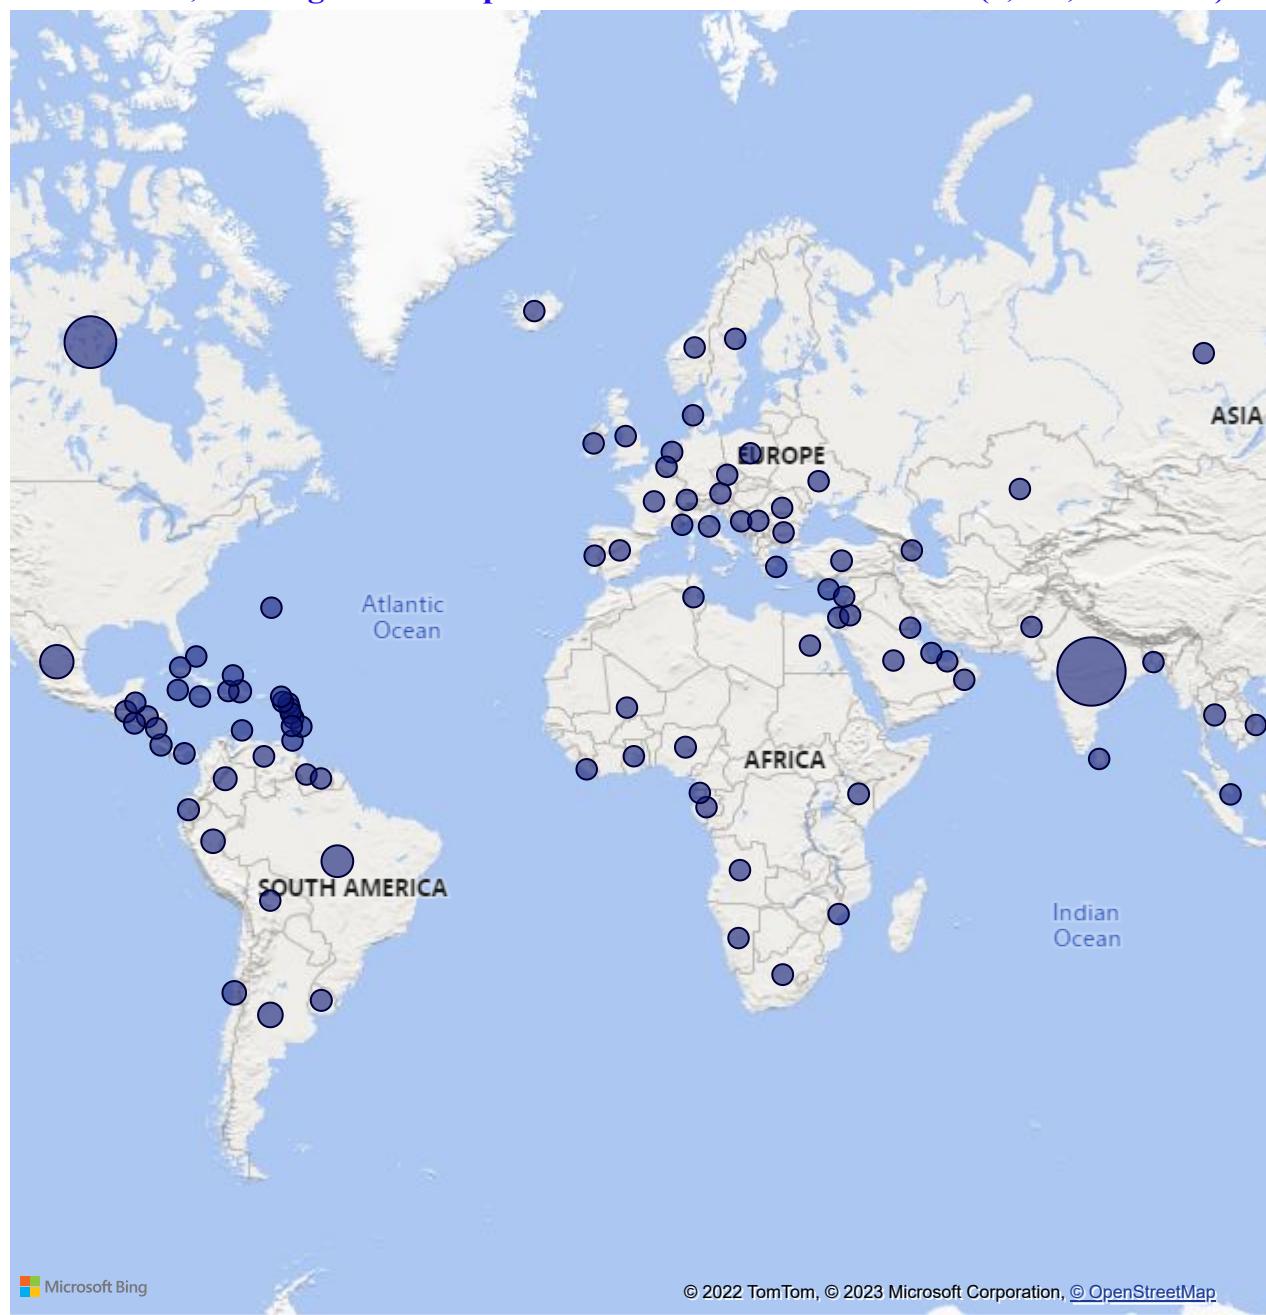

In 2009, this Map Indicated that Fertlizers from USA are Exported to different countries in a Diverse Pattern. Majorly Europe, Africa and South American countries, Although India Imported the Bulk of the Fertilizers (4,035,218.3tons)

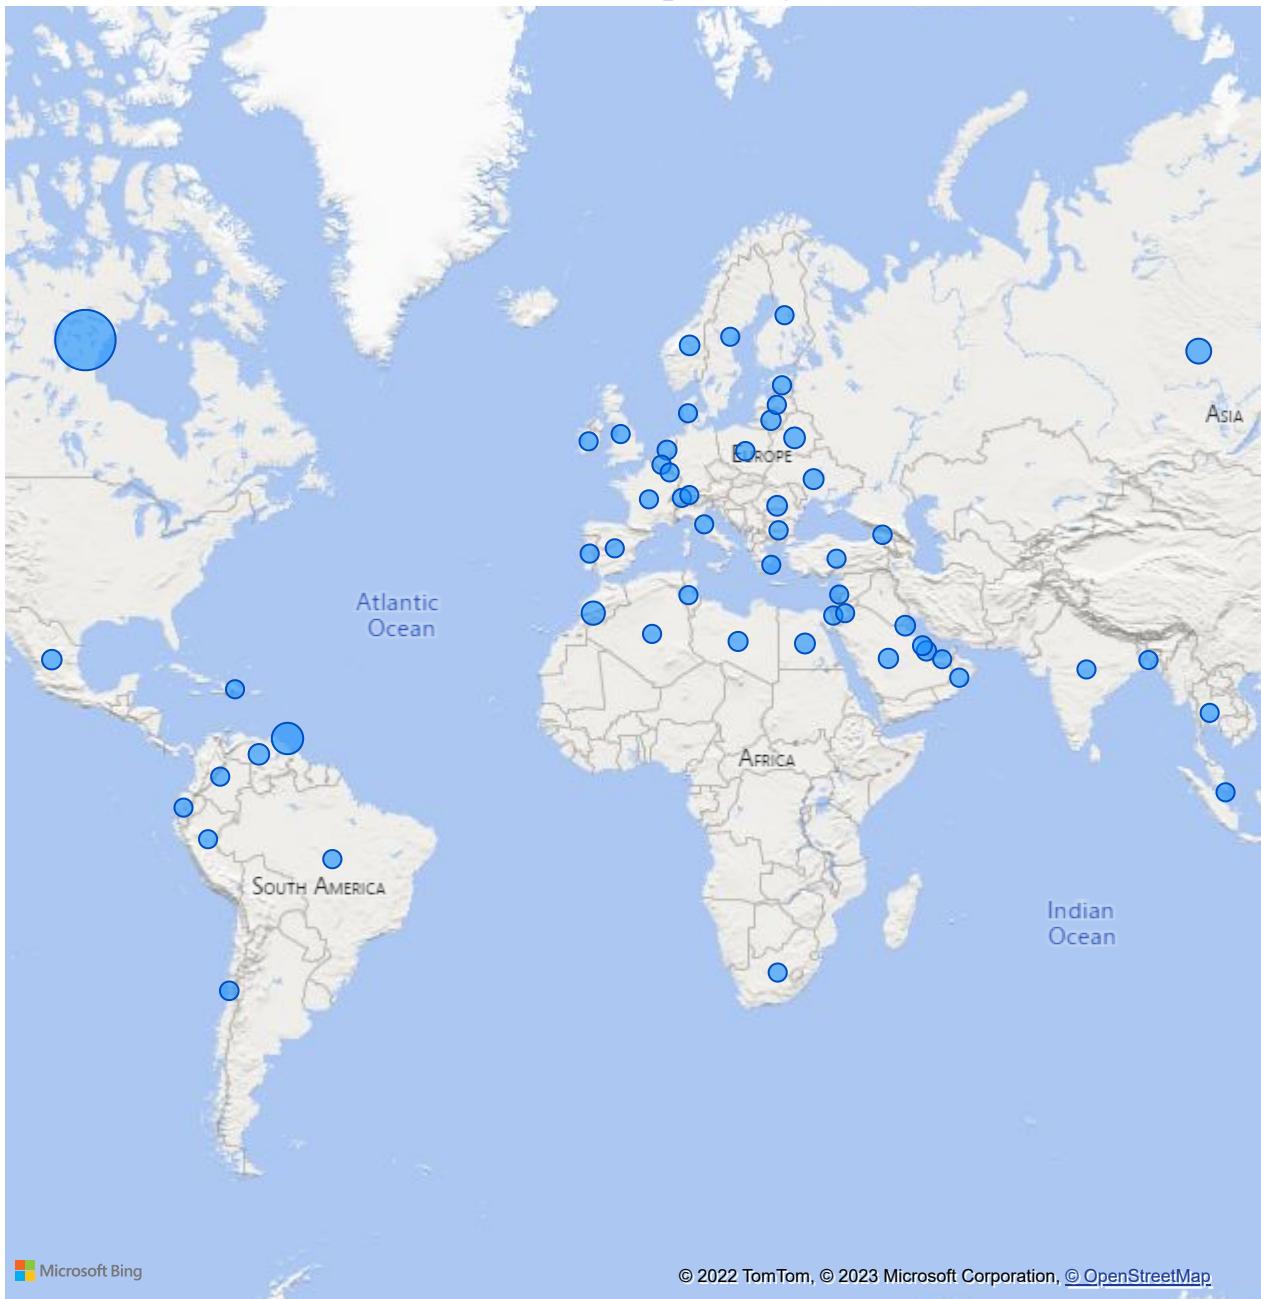

In 2008, this Map Indicated that most of the Fertilizers are Imported from European Countries, Although Canada is the countries that Exported most of the Fertilizers Impoted by USA

In 2008, this Map Indicated that Fertlizers from USA are Exported to different countries in a Diverse Pattern. Majorly Europe, Africa and South American countries, Although India Imported the Bulk of the Fertilizers (3,702,802.1tons)

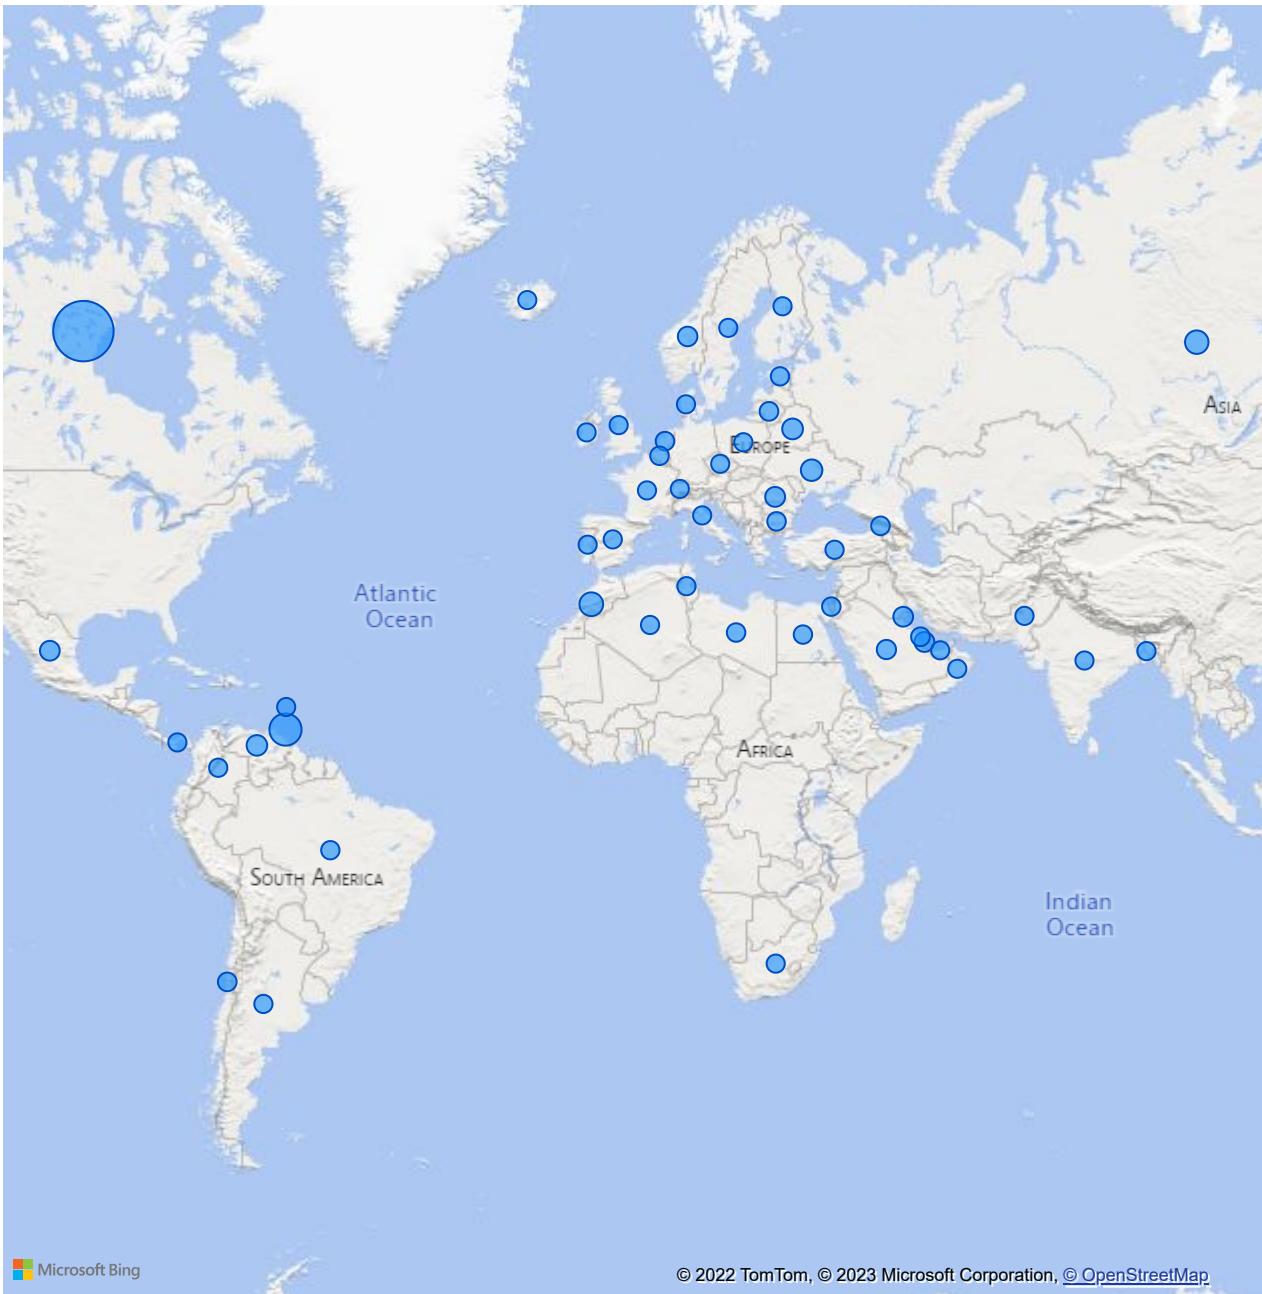

In 2007, this Map Indicated that most of the Fertilizers are Imported from European Countries, Although Canada is the countries that Exported most of the Fertilizers Impoted by USA

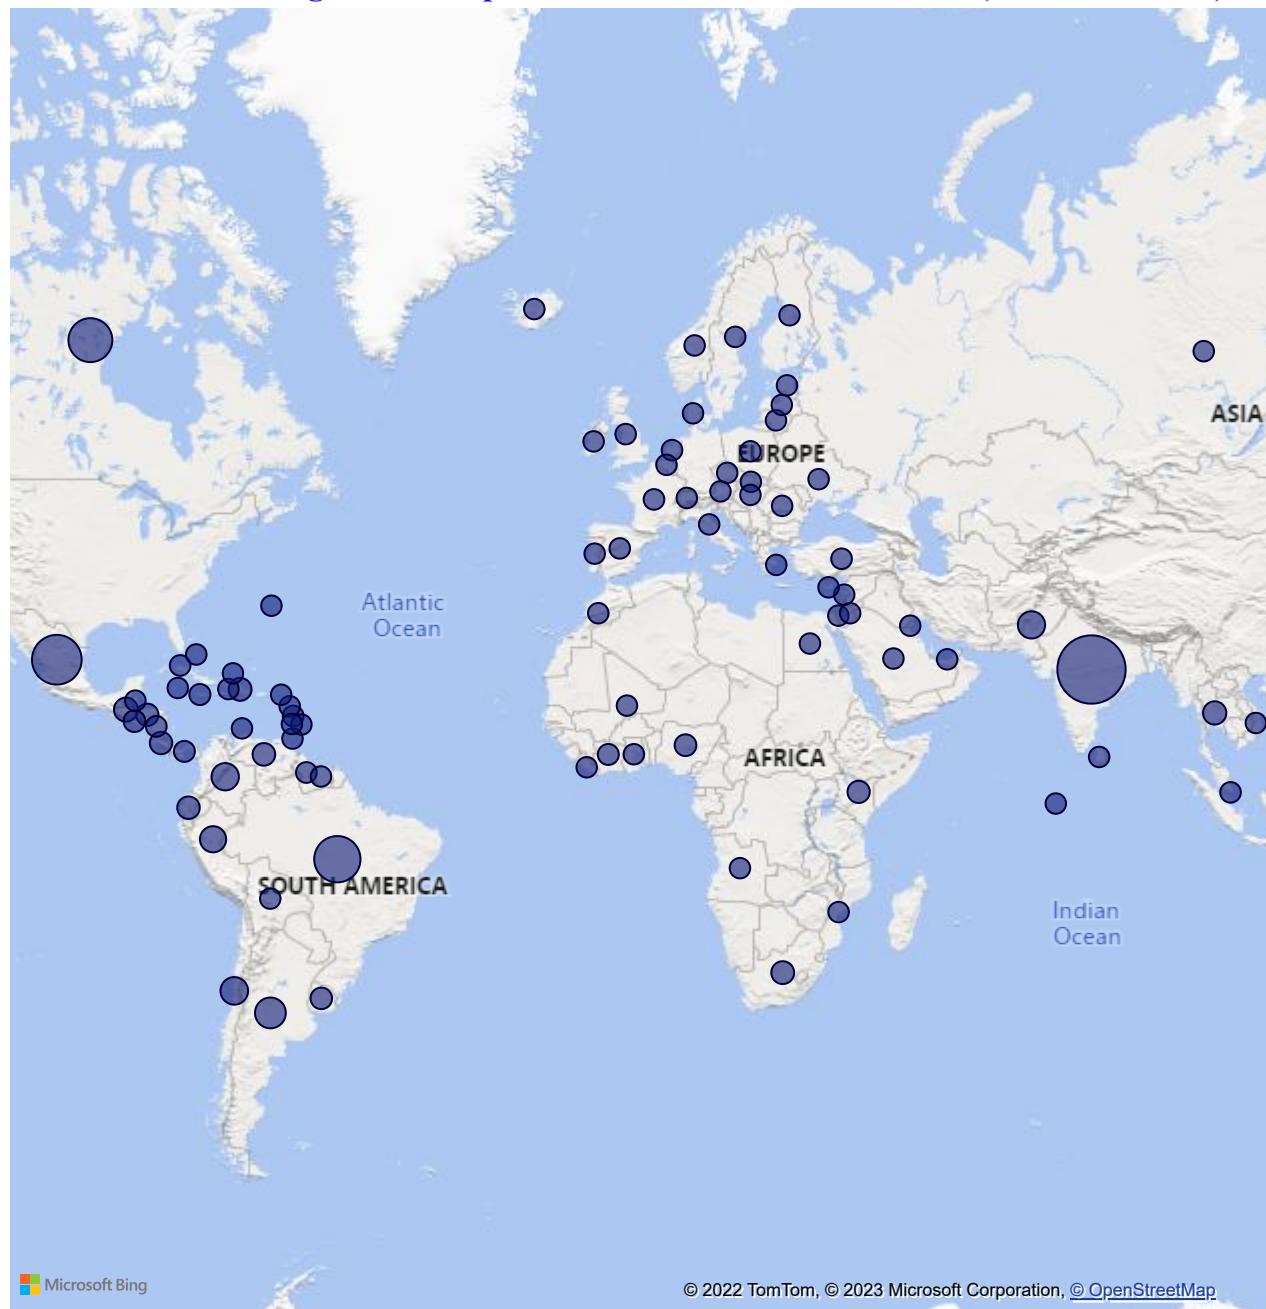

In 2007, this Map Indicated that Fertlizers from USA are Exported to different countries in a Diverse Pattern. Majorly Europe, Africa and South American countries, Although India Imported the Bulk of the Fertilizers (2,212,714.0tons)

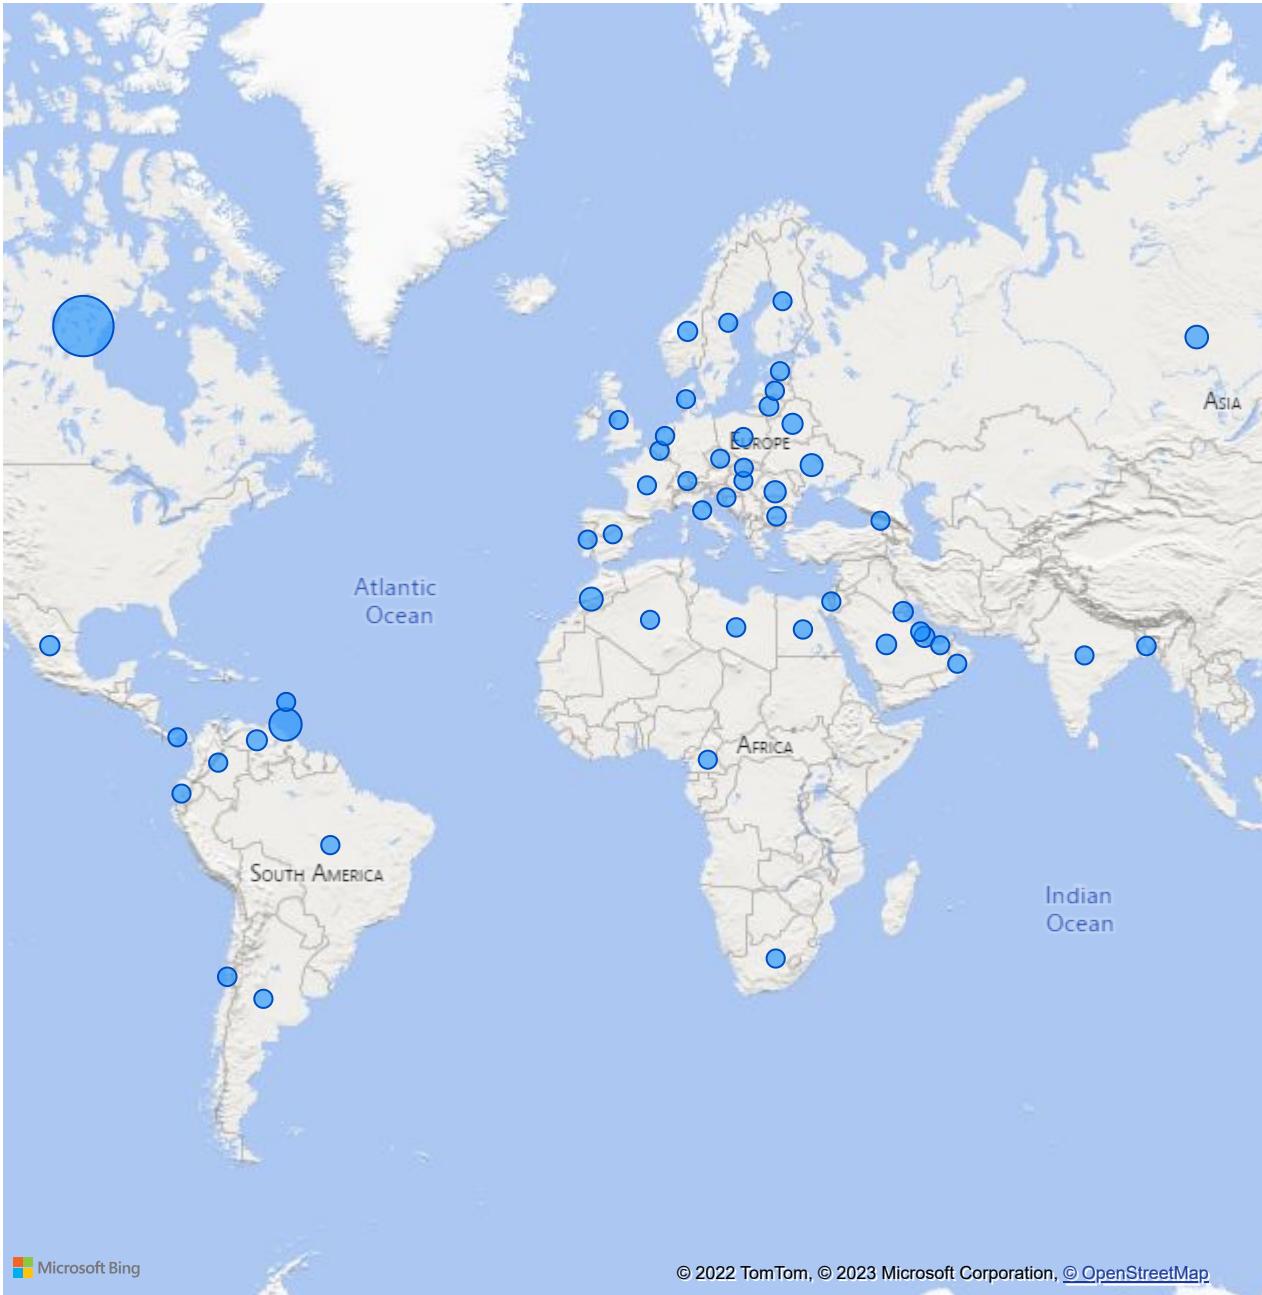

In 2006, this Map Indicated that most of the Fertilizers are Imported from European Countries, Although Canada is the countries that Exported most of the Fertilizers Impoted by USA

In 2006, this Map Indicated that Fertilizers from USA are Exported to different countries in a Diverse Pattern. Majorly Europe, Africa and South American countries, Although India Imported the Bulk of the Fertilizers (2,622,357.4tons)

In 2005, this Map Indicated that most of the Fertilizers are Imported from European Countries, Although Canada is the countries that Exported most of the Fertilizers Impoted by USA

In 2005, this Map Indicated that Fertilizers from USA are Exported to different countries in a Diverse Pattern. Majorly Europe, Africa and South American countries, Although India Imported the Bulk of the Fertilizers (1,941,576.9tons)
